

# Patio Heaters

Holiday feeling throughout the year

**NEW:**  
**2-stage**

**Schwank**  
INNOVATIVE HEATING SOLUTIONS

# Summer Feeling by the simple Press of a Button

## ■ Extend the season

To many restaurants and pubs it has become an established standard: patio heating. This is because outdoor heating has become a success factor for driving sales. This trend continues as customers increasingly prefer not to give up the comfort of that summer feeling and the joy of sitting outdoors.

A holiday atmosphere throughout the whole year and heated smoking zones - that's what attracts many customers.

Environmentally friendly gas-infrared heaters are an ideal solution to cater for this trend. Since many restaurants and hotels use natural gas for heating and cooking already, a connection to the network is easy.

Gas-infrared radiant heaters are ideal to heat outdoor areas. Just like the sun, these heaters generate radiation, which in turn is transferred into heat, when it strikes solid matters such as human bodies and the floor. Hence, the air is not heated directly. The reaction time is so quick that guests are feeling the warmth immediately after the heaters have been switched on.

## ■ Benefits of terrasSchwank vs. standard mushroom heaters

- No more annoying exchange, stocking and storing of propane tanks required
- **Energy savings of an average 62%** due to innovative infrared / ceramic technology
- No more needless packing away or chaining of heaters required; also no damages to heaters due to transportation
- No waste of seating capacity due to space-saving installation on walls
- Immediate comfortable heat
- Even and balanced temperature distribution, no punctual heat
- Wind protection due to the WindSecure system; virtually avoids flame blow-out - a real advantage in coastal and windy regions
- Quality „Made in Germany“

More heat means more customers which in turn translates in more sales and profit. The investment in terrasSchwank and the associated operation. Furthermore, the reputation will increase as a more

# Comfortable Heat despite Cold Weather

## ■ terrasSchwank

Schwank has developed a patio heater that has been especially designed for the needs of the hospitality industry with a focus on a quick pay-back period.

Due to the elegant design terrasSchwank suits unobtrusively the building architecture and exterior design.

## ■ WindSecure-system

In order to ensure perfect operations in areas with high wind velocities, terrasSchwank is equipped with the innovative WindSecure system\* providing a stable flame when other systems fail.

When installed exposed to rain or under awnings, a rain hood can be used to prevent rain impact and to decrease the distance to combustibles.

\*available only for A-Models

## ■ 2-stage operation

By using the 2-stage operation option the heating power of terrasSchwank will be continuously adapted to the actual heat demand in order to provide maximum comfort.

## ■ Definite satisfaction

Dirk Bungert from the Grand Café Sahne in Bocholt says:

*„A warm terrace is essential for our business. By using Schwank outdoor heaters, we were able to increase our average turnover by 22% with only a small investment. Thus, the investment for Schwank heaters has paid off very quickly; that is within 2 months actually. We are very satisfied with these products and their services provided.“*

nto higher demand for food & beverages – thus higher turnover  
ated operational cost can pay off within the first two months of  
re visible attendance of guests attracts other guests.

# Innovative. Experienced. Competent.

For more than 80 years, the name Schwank has stood for high-quality and cost-efficient heating systems. As a German manufacturer, we aspire to a high standard of excellence in delivering products and service of the highest quality. We guarantee an efficient and environmentally friendly operation with every product we sell.

## terrasSchwank

terrasSchwank patio heaters are available with manual or automatic ignition. Model A is available with pilot burner. Due to this the flame will not be blown out when windy.

### Models

terrasSchwank+ 4, 4A

terrasSchwank+ 7/2A

### Accessories

Full cover: rain protection and distance to combustibles hood

Heater type	Nom. input load [Hi]	Dimensions [mm]						Weight [kg] with/without full cover Ignition	
		A	B	C	D	E	F	Manual	Automatic
